

SHAIK YUSUF JOHN

Flask Developer | Python | Exploring AI with PyTorch
+91 9550654441 | yusufjohn252007@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

B.Tech CSE student with hands-on experience in Python, Flask, HTML, and CSS. Completed an online internship at Cognifyz Technologies focused on C and C++ programming. Built authentication-based web applications and actively improving backend and frontend development skills through real-world projects. Solved 133+ LeetCode problems with a contest rating of 1501 and currently exploring Deep Learning and AI development using PyTorch. Passionate about scalable software systems, modern web technologies, and building impactful products.

EDUCATION

Aditya University 2025 – 2029 (Expected)
B.Tech, Computer Science Engineering (SAP) – CGPA: 8.18

TECHNICAL SKILLS

Backend: Python, Flask
Frontend: HTML, CSS
Languages: C, C++, Python
Tools: Git, GitHub, LeetCode
AI / ML: PyTorch (Exploring), Deep Learning Fundamentals

EXPERIENCE

C & C++ Programming Intern Online | 2024
Cognifyz Technologies

- Completed an online internship focused on core C and C++ programming concepts and problem-solving.
- Worked on structured programming tasks covering data types, control flow, functions, and OOP fundamentals in C++.
- Strengthened understanding of memory management, pointers, and low-level programming logic through hands-on assignments.
- Gained practical exposure to industry coding standards and developed disciplined programming habits.

PROJECTS

Flask Login & Signup System Python, Flask, HTML, CSS, Authentication
GitHub: <https://github.com/yusufjohn-shaik/flask-login-signup-system>

- Developed a secure authentication web application using Flask backend architecture.
- Implemented user signup, login, session handling, and route protection mechanisms.
- Designed responsive frontend pages using HTML and CSS for enhanced user interaction.
- Structured backend workflows and authentication logic for maintainability and scalability.
- Improved understanding of backend routing, user management, and full-stack application flow.

COMPETITIVE PROGRAMMING & CERTIFICATIONS

LeetCode: 133+ Problems Solved | Contest Rating: **1501** | Global Rank: **Top 44.02%**

- Participated in Google HackSprint 2K25
- Cyber Security Internship Certification
- Python Essentials Certification
- AI Fundamentals Certification
- GUVI Certification

LEADERSHIP & CURRENT FOCUS

- Actively exploring backend systems and AI/Deep Learning development using PyTorch.
- Building real-world full-stack projects and consistently improving algorithmic problem-solving skills.
- Preparing for software engineering internships and full-stack development roles.
